CEN Review Question

A patient presents with a history of nausea, vomiting, and diarrhea for several days after a Caribbean cruise. In the emergency department, she is weak, moderately hypotensive, and dehydrated. An ECG shows bradycardia, mild ST depression, and a U wave with some ventricular ectopic beats. What is the most likely electrolyte abnormality?

- A. Hypomagnesemia**
- B. Hyperkalemia**

- C. Hypokalemia**
- D. Hypocalcemia**

CEN REVIEW QUESTION ANSWER: C--HYPOKALEMIA
